PROFESSIONAL SUMMARY

Final-year B.E. Artificial Intelligence & Data Science student (2027 batch, CGPA: 8.93/10) with hands-on experience in data cleaning, validation, and quality audits using Excel (XLOOKUP, Power Query, Pivot Tables), SQL, and Python. Cleaned and audited datasets of 10,000 to 50,000+ records, flagged mapping exceptions, and built Excel and Power BI dashboards and KPI reports for stakeholders. Documented pipeline logic and automated validation checks with pytest and GitHub Actions. Seeking a Data Associate role in financial technology.

EDUCATION

Bachelor of Engineering (B.E.) – Artificial Intelligence and Data Science 2023 – 2027 (Expected)
Smt. Indira Gandhi College of Engineering, Navi Mumbai | CGPA: 8.93/10 (up to Sem 6)

TECHNICAL SKILLS

Data Quality & Validation: Data Cleaning, Data Validation, Data Quality Checks, Data Standardization, Data Mapping, Exception Reporting, Data Integrity, Technical Documentation
Excel: XLOOKUP, VLOOKUP, IFERROR, PROPER/TRIM, Power Query, Pivot Tables, Slicers, Excel Dashboards
SQL & Python: SQL (CTEs, JOINS, Window Functions, Aggregate Functions, CASE), PostgreSQL, Python, Pandas
BI & Reporting: Power BI, DAX, Dashboard Development, KPI Reporting, Data Visualization, Streamlit
Tools & Cloud: Git, GitHub, GitHub Actions (CI/CD), pytest, Microsoft Azure (Azure Data Fundamentals, DP-900)
Analytics & ML: EDA, Trend Analysis, RFM Segmentation, Scikit-learn, NLP, Generative AI

EXPERIENCE

Power BI Fellow – Microsoft Elevate Program (AICTE Virtual Internship) Feb 2026 – Mar 2026
Retail Sales, Segmentation & Discount Optimization | GitHub
PostgreSQL, SQL, Power BI, DAX, Power Query

- Cleaned, validated, and quality-checked Rs. 5.86B of gross sales data across 50,000+ retail transactions in PostgreSQL to support accurate reporting.
- Analyzed the data with SQL (CTEs, JOINS, Window Functions, CASE statements, Aggregate Functions) and RFM segmentation; identified Repeat Buyers as the highest revenue-generating customer segment.
- Developed interactive Power BI dashboards using DAX and Power Query to track KPIs, customer segments, and sales trends, delivering standardized reports that supported pricing decisions for stakeholders.

PROJECTS

Global Logistics Master Data Mapping & Quality Audit GitHub
Microsoft Excel (XLOOKUP, Power Query, Pivot Tables, Slicers), Python (Pandas)

- Built an Excel workflow (Power Query and formulas) to clean and standardize 10,000 global shipping records with inconsistent text formatting and outdated inventory codes.
- Standardized vendor names with PROPER and TRIM, and mapped legacy product IDs to a standardized product master catalog using XLOOKUP with IFERROR.
- Flagged 2,064 mapping anomalies (retired or missing product codes) with a clear review label instead of #N/A errors.
- Calculated COGS across all 10,000 rows by linking verified SKUs to unit costs, and built an interactive Excel dashboard showing revenue by carrier and verified SKUs versus mapping failures.

AI-Powered Natural Language to SQL BI Assistant GitHub | Live Demo
Python, PostgreSQL, Pandas, Streamlit, Plotly, Power BI, GitHub Actions, pytest, openai/gpt-oss-120b

- Built an end-to-end application on an 8-table AdventureWorks PostgreSQL database that converts plain-English questions into validated SQL and auto-visualizes results, achieving 92.9% (13/14) accuracy on a 14-question test set.
- Implemented a code-level guardrail that blocks non-SELECT statements, plus an 18-test pytest suite with GitHub Actions CI/CD, to ensure reliable, governed data outputs.
- Added a normalized return-rate analysis after catching that raw counts overstated one territory's returns (Australia: 208 returns, but a 2.19% rate, below France and Southeast).

Employee Attrition & Sentiment Analytics GitHub | Live Demo
Python, Pandas, Scikit-learn, TF-IDF, Streamlit

- Conducted exploratory analysis on 1,470 employee records and 50,000 reviews, cleaning and transforming structured and unstructured data with Python and Pandas.
- Trained models achieving 0.815 AUC-ROC (attrition) and 0.893 AUC-ROC (sentiment) and built an interactive Streamlit dashboard for workforce insights.

CERTIFICATIONS

Microsoft Certified: Azure Data Fundamentals (DP-900)	July 2026
Deloitte Data Analytics Job Simulation	Apr 2026
Google Crash Course on Python – Coursera	Jan 2025
