

Pooja Dhamale

Business Analyst — Data Analysis & Visualization — Generative AI

dhamalepooja15@gmail.com | Navi Mumbai, MH | linkedin.com/in/pooja-dhamale | github.com/PoojaDhamale

PROFESSIONAL SUMMARY

Final-year B.E. Artificial Intelligence & Data Science student (CGPA: 9.46/10) with hands-on experience gathering business requirements, performing data analysis to answer business questions, and translating findings into KPI reports and dashboards for stakeholder decision-making. Skilled in requirements analysis, SQL, Power BI, Excel, data visualization, and process/data validation. Built an AI-powered Natural Language-to-SQL BI Assistant that turns plain-English business questions into validated, tested insights. Microsoft Certified: Azure Data Fundamentals (DP-900).

TECHNICAL SKILLS

Core Competencies: Data Analysis, Data Visualization, Problem Solving, Data-Driven Decision Making

AI & Generative AI: Generative AI, LLM Applications, Natural Language-to-SQL, Prompt Engineering

Programming & Databases: Python, SQL, PostgreSQL

Data & Analytics: Data Cleaning, Data Preparation, Data Validation, Data Wrangling, EDA, Statistical Analysis, Trend Analysis, Data Transformation

BI & Reporting: Power BI, DAX, Power Query, MS Excel (Pivot Tables, VLOOKUP/XLOOKUP, Charts), KPI Reporting, Dashboard Development, Business Intelligence

Machine Learning & NLP: Scikit-learn, TF-IDF, Machine Learning, Natural Language Processing

EXPERIENCE

Power BI Fellow – Microsoft Elevate Program (AICTE) Virtual Internship

Feb 2026 – Mar 2026

Project: Retail Sales, Segmentation & Discount Optimization

PostgreSQL, SQL, Power BI, DAX, Power Query | GitHub

- Analyzed 50,000+ retail transactions using SQL with CTEs, JOINS, Window Functions, CASE statements, Aggregate Functions, and RFM Segmentation.
- Performed data cleaning, validation, and quality checks on Rs. 5.86B gross sales data and identified Repeat Buyers as the highest revenue-generating customer segment.
- Developed interactive Power BI dashboards using DAX and Power Query to visualize KPIs, customer segmentation, and sales performance trends.
- Generated standardized dashboards and reports to communicate business insights and support pricing and data-driven decision-making for stakeholders.

PROJECTS

AI-Powered Natural Language to SQL BI Assistant

GitHub | Live Demo

Python, PostgreSQL, Pandas, openai/gpt-oss-120b, Streamlit, Power BI

- Built an end-to-end AI-powered business intelligence application that extracts and cleans data from an 8-table relational database and converts natural language business questions into validated SQL queries with 92.9% evaluation accuracy.
- Designed modular, object-oriented components for data validation, query execution, and processing, with clear documentation of pipeline logic and assumptions for maintainability.
- Implemented automated SQL safety validation and an 18-test pytest suite with GitHub Actions CI/CD to ensure reliable and governed AI-generated data outputs.
- Engineered a multi-step business analysis engine for “why” questions, orchestrating sequential queries across time, category, and territory dimensions to generate data-grounded insights.

Employee Attrition & Sentiment Analytics

Live Demo

Python, Pandas, Scikit-learn, TF-IDF, Streamlit

- Performed exploratory data analysis on 1,470 employee records and 50,000 employee reviews to identify attrition patterns and sentiment trends.
- Cleaned and transformed structured and unstructured datasets using Python, Pandas, and text preprocessing techniques to prepare data for machine learning.
- Built machine learning models achieving 0.815 and 0.893 AUC-ROC for attrition and sentiment prediction respectively.
- Designed an interactive dashboard to communicate workforce insights and support data-driven HR decision-making.

EDUCATION

B.E. – Artificial Intelligence and Data Science

2023 - 2027

Smt. Indira Gandhi College of Engineering, Navi Mumbai | CGPA: 9.46/10

CERTIFICATIONS

Microsoft Certified: Azure Data Fundamentals (DP-900)

July 2026

Deloitte Data Analytics Job Simulation

Apr 2026

Google Crash Course on Python – Coursera

Jan 2025
